

CLUBB CONCRETE LTD

Carbon Footprint/ Sustainability Policy Statement

It is the stated policy of Clubb Concrete Ltd to reduce, its environmental impact, where practicable.

Carbon reducing measures form an integral part of the overall Company strategy, helping to improve both operational performance and a reduction in potentially harmful emissions to land, water and air.

The Company's aim is to reduce carbon emissions year on year, where practicable.

To help achieve this, the Company will;

- Comply with all current energy legislation, including recommendations from the MPA (Mineral Products Association)
- Minimise waste, promote recycling, and the use of recycled products to help reduce the burden on landfill, and therefore methane generation
- Promote environmental awareness and responsibility amongst employees and others, and will seek where practicable, to continuously improve Company environmental performance
- Set targets for all sites to reduce energy consumption, with incentives for employees
- Promote efficient use of water resources
- Phase in energy efficient carbon reducing equipment when replacing plant and equipment where practicable
- Carry out assessments for the procurement of fuel-efficient vehicles

Actions developed to date include;

- Company audit by the Carbon Trust to evaluate energy saving opportunities
- Senior management meetings to evaluate/programme Company energy saving plan
- Integration of environmental issues into all aspects of the decision-making process
- Installation of energy efficient, therefore carbon reducing equipment, on new plant
- Sustainable sourcing purchasing policy

The Carbon Footprint Policy Statement underpins the existing environmental policy statement
